*The *Quadra-Hull* tank is backed by the *Culligan Limited Lifetime Warranty*. The terms of product warranties vary and may be modified from time to time. Culligan will provide a copy of same upon request.

*The Culligan Exclusive Quadra-Hull™ tank with four layers of construction is backed by a Limited Lifetime Warranty.**

Quadra-Hull™ – Four Layers of Construction

Layer 1

The media tank liner is molded from an NSF approved material and is molded thicker on the ends to provide high impact resistance.

Layer 2

A composite shell with two component epoxy resin creates the second layer. Culligan uses more composite material than any other standard tank on the market today.

Layer 3

A space-aged carbon material makes the third layer of the Quadra-Hull™ tank. This lightweight material has strength exceeding that of existing metal materials. This type of carbon is used in many applications such as the space shuttle, automobiles and golf clubs.

Layer 4

The fourth layer of protection the Quadra-Hull tank provides is the tank jacket. It is impervious to rust, won't corrode and is UV resistant. The jacket also keeps the tank from sweating keeping your customer's floor dry.
